Summary Statistics Tables

Table 1: Summary Statistics for NLSY Variables Physical Health scale ranges from 10 to 70. Depression measure from CES-D, ranging from 0 to 24; Neuroticism and Conscientiousness dervied from TIPI, ranging from 1 to 7; Education represents highest grade completed, ranging from 0 (none) to 20 (eight years of college or more); Income represents total net family income in 2014 dollars

Variable	Mean	Standard Deviation	Minimu	ım 25th Percentile	50th Percentile	75th Percentile		Number of Observations
Physical Health ⁱ	51.99	8.08	11.22	51.26	54.84	56.51	68.37	8,402
Physical Health ⁱⁱ	49.09	10.29	11.22	46.67	53.55	55.50	67.31	7,804
Depression ⁱⁱ	3.88	4.51	0.00	0.00	2.00	6.00	21.00	7,813
Neuroticism	2.90	1.39	1.00	2.00	3.00	4.00	7.00	6,969
Conscientous	sne s s73	1.32	1.00	5.00	6.00	7.00	7.00	6,966
Education ⁱⁱ	13.33	2.57	0.00	12.00	12.00	15.00	20.00	7,693
$Income^{ii}$	68,487.81	85,978.38	-3.26	11,342.18	47,000.00	94,861.85	595,986.00	7,693

ⁱAs measured at age 40

Discordant Kinship Regression Results

Does Conscientiousness Causally Influence Physical Health (At Age 50)?

ⁱⁱAs measured at age 50

Characteristic	Beta	T-Statistic	95% CI	P-Value
age_50_physical_health_mean	-0.85	-39.3	-0.90, -0.81	< 0.001
conscientousness_diff	0.01	1.26	-0.01, 0.04	0.2
conscientousness_mean	0.05	2.45	0.01, 0.09	0.014
sex_1	0.02	0.504	-0.05, 0.08	0.6
race_1	-0.05	-1.49	-0.11, 0.02	0.14
sex_2	-0.07	-2.09	-0.13, 0.00	0.037

Does Conscientiousness Causally Influence Mental Health (Depression)?

Characteristic	Beta	T-Statistic	95% CI	P-Value
depression_mean	0.83	40.1	0.79, 0.87	< 0.001
$conscientousness_diff$	-0.02	-2.16	-0.05, 0.00	0.031
conscientousness_mean	0.04	2.05	0.00, 0.08	0.041
sex_1	-0.04	-1.33	-0.10, 0.02	0.2
race_1	-0.09	-3.12	-0.15, -0.03	0.002
sex_2	0.07	2.23	0.01, 0.13	0.026

Does Conscientiousness Causally Influence Mental Health (Depression) with Income and Highest Grade Level (At Age 50) as Covariates?

Characteristic	Beta	T-Statistic	95% CI	P-Value
depression_mean	0.82	22.0	0.75, 0.89	< 0.001
$conscientousness_diff$	-0.02	-1.06	-0.06, 0.02	0.3
$highest_grade_at_age_50_diff$	0.00	0.432	-0.02, 0.02	0.7
$tnfi_at_age_50_diff$	0.00	-0.179	0.00, 0.00	0.9
conscientousness_mean	0.00	0.055	-0.07, 0.07	>0.9
highest_grade_at_age_50_mean	0.00	0.100	-0.02, 0.03	>0.9
$tnfi_at_age_50_mean$	0.00	0.648	0.00, 0.00	0.5
sex_1	-0.10	-2.06	-0.20, 0.00	0.040
race_1	-0.06	-1.19	-0.16, 0.04	0.2
sex_2	0.04	0.870	-0.05, 0.14	0.4

Does Neuroticism Causally Influence Mental Health (Depression)?

Characteristic	Beta	T-Statistic	95% CI	P-Value
depression_mean	0.83	39.1	0.79, 0.87	< 0.001
$neuroticism_diff$	0.05	4.45	0.03,0.07	< 0.001
neuroticism_mean	-0.03	-1.41	-0.07, 0.01	0.2
sex_1	-0.03	-0.941	-0.09, 0.03	0.3
race_1	-0.09	-3.08	-0.15, -0.03	0.002
sex_2	0.06	1.88	0.00, 0.11	0.060

Does Neuroticism Causally Influence Mental Health (Depression) with Income and Highest Grade Level (At Age 50) as Covariates?

Characteristic	Beta	T-Statistic	95% CI	P-Value
depression_mean	0.81	21.9	0.74, 0.88	< 0.001
neuroticism_diff	0.06	3.40	0.03, 0.10	< 0.001
$highest_grade_at_age_50_diff$	0.00	-0.361	-0.02, 0.02	0.7
$tnfi_at_age_50_diff$	0.00	-0.698	0.00, 0.00	0.5
neuroticism_mean	-0.01	-0.230	-0.08, 0.06	0.8
highest_grade_at_age_50_mean	0.00	0.265	-0.02, 0.03	0.8
$tnfi_at_age_50_mean$	0.00	0.706	0.00, 0.00	0.5
sex_1	-0.12	-2.53	-0.22, -0.03	0.012
race_1	-0.06	-1.25	-0.16, 0.04	0.2
sex_2	0.07	1.35	-0.03, 0.16	0.2

Non-Discordant Kinship Regression Results

Does Conscientiousness Causally Influence Physical Health (At Age 50)?

Characteristic	Beta	T-Statistic	95% CI	P-Value
conscientousness	0.06	2.93	0.02, 0.09	0.003
race	0.23	5.59	0.15, 0.31	< 0.001
sex	0.16	3.95	0.08, 0.24	< 0.001

Does Conscientiousness Causally Influence Mental Health (Depression)?

Characteristic	Beta	T-Statistic	95% CI	P-Value
conscientousness	-0.15	-7.26	-0.19, -0.11	< 0.001
race	-0.12	-2.93	-0.21, -0.04	0.003
